INTRODUCTORY

With no help available coupled with the latest and worst planting spring of our experience, we are wondering why we are issuing a list at all this year. Might I suggest it is more of a spasm than a list. Just don't want to be a quitter 'sall. Most of the trays in our bulb house are loafin' and the rest look lonesome.

A salute to our fine customers who have stuck by us in the past and kept us in the running, and we hope many new customers will pal up this year.

We do not wish to disappoint our customers to whom we are so sincerely thankful, but we do honestly urge that they send their orders early to avoid disappointment as a perusal of this list will assure you how scarce most all of our varieties are.

Our extensive hybridizing operations under present world conditions decree that our large number of promising seedlings on test be kept moving at the expense of larger stocks of our named varieties.

We herein give blooming dates as near as possible from an average of years for us, also year of introduction, just after each variety name.

Customers will note we are unable to cut prices this year with such a small stock of most every variety listed except a few of the higher priced 1943 introductions on which we reduced prices in accordance with available stock.

After all, we are originators and introducers of our own varieties only and will endeavor to have a good stock of all our 1945 releases. We have several fine seedlings with stock enough to introduce this year but prefer to greatly increase the stock of each and introduce in 1945. One of these being the large informal champion seedling at W. Va., 1942, with a three spike score of 89 at Ohio State, 1943. All who have seen it declare it the finest Wilson origination to date. We hope to shove it and several other top seedlings around the circuit next show season.

With a shortage of bulbs everywhere and from the early volume of inquiries coming in, we anticipate a sell out this year and if such is the case, our stock of present varieties will be still smaller in 1945.

As we are cutting down on the size of our list this year we are not going into fullest details on descriptions and with many show reports not in yet we do not have the complete winnings of all our varieties for 1943.

We issue no wholesale list and this year especially will have no large bulbs for sale. Can possibly make a wholesale price later on a few planting stock of several of our best commercial varieties. This will be a matter of correspondence.

In this age of rush, bust and fight, we consider ourselves very fortunate in that we are able, by hard work and long hours, to make a modest living by hybridizing. We have completely given up the idea of ever being classed among the financiers. The cash consideration is secondary compared to the pleasure one receives in working with such a wonderful flower as the gladiolus—"OUR NATIONAL FLOWER."

Was hoping for some new halftones for this year's list, but again have to hang out the "TOO BUSY" sign and promise ourselves that next year it SHALL be done.

By burning the old candle all hours of the night we try to acknowledge all correspondence, though somewhat tardy mostly and not in the manner we wish to.

Keep the one most intelligent of your two eyes on a slant—not cockeyed—toward . . .

LARIME, the long winded champion at Ohio State. KING CLICK, first under the wire at Ohio State, Cleveland, and that big exhibition gray FLYING FORTRESS, which made a direct hit of 92 points at Ohio State. All 1943. Also if you are not already stocked with the following choice varieties there is no better time than now to secure a start in small and bulblets.

HIGH FINANCE, TREASURY GOLD, OHIO NONPAREIL, SILVER BANQUET, PURPLE SUPREME, FRANCES M. IRWIN, KING TAN, BEAUTY CLYNIC, DRUM MAJOR, MRS. RICHARD McGOVERN, ROSE DEFIANT, and BUCK-EYE BRONZE. Particularly stressing the high quality of these thorobreds. All good winners of blues and better at major shows in the past and no law saying YOU can't win with them.

We will not give winnings of all varieties show for show as in the past as those who have been receiving our list regularly have them anyway as well as the parentage, all of which was given complete in our 1943 list. Just in case you may wish either or both, we can supply them on request.
